GROUP

ITD Group

An established enterprise technology company.

ITD Services is an enterprise software engineering and digital transformation company established in **2018**.

Our team of **30+ in-house professionals** — engineers, architects, designers, QA, BAs and DevOps practitioners — operates from **Andheri, Mumbai**.

We are the technology arm of the **ITD Group of Companies** — serving clients across India, USA, UK, UAE and Australia.

Custom Enterprise

Capabilities across the enterprise stack.

APPLICATIONS

- Enterprise Software
- Custom Applications
- SaaS Platforms
- Mobile + Web Apps

AI & AUTOMATION

- OCR + Document Intelligence
- Invoice Extraction
- Workflow Automation
- Approval Workflows

FINANCE & COMPLIANCE

- Invoice Management
- Rent Invoice Management
- Vendor Invoice Management
- GST Computation

INTEGRATION

- ERP Integration
- API Engineering
- Third-Party Systems
- Notification Engines

SECURITY

- Role-Based Access Control
- Authentication + SSO
- Audit Logging
- Encryption + DPDP

DATA & BI

- Reports & Dashboards
- Business Intelligence
- Real-time Analytics
- Data Pipelines

Banking & Financial Services alignment

Our existing enterprise software capabilities closely align with the requirements of the banking and financial services industry. We have the technical expertise to design and develop customized enterprise solutions for banks and financial institutions — these modules can be customized and extended to meet banking-specific workflows and compliance requirements.

Enterprise platforms we have built, scaled and operate.

We have built and operate a **proprietary multi-tenant enterprise platform** for the logistics industry — serving **300+ enterprise clients** with millions of records processed. **The platform demonstrates our ability to design, develop and scale complex enterprise-grade software**, and the same engineering discipline extends to every custom enterprise build we deliver.

A milestone-driven delivery system.

What we are engineering right now.

• ACTIVE DEVELOPMENT

Quantum Computing Platform

Under active development for a **US-based client**. Enables researchers and financial institutions to process complex financial datasets using **quantum algorithms**.

• IN PRODUCTION

Enterprise Logistics SaaS Platform

Multi-tenant platform serving **300+ enterprises**. Continuous roadmap expansion across OCR + AI, invoice + GST, mobile and analytics modules.

• ACTIVE ENGAGEMENTS

Enterprise Invoice & Compliance Modernisation

Customisable invoice + compliance modules (OCR, GST, vendor, rent, approval, ERP) for **banking, financial services and enterprise segments**.

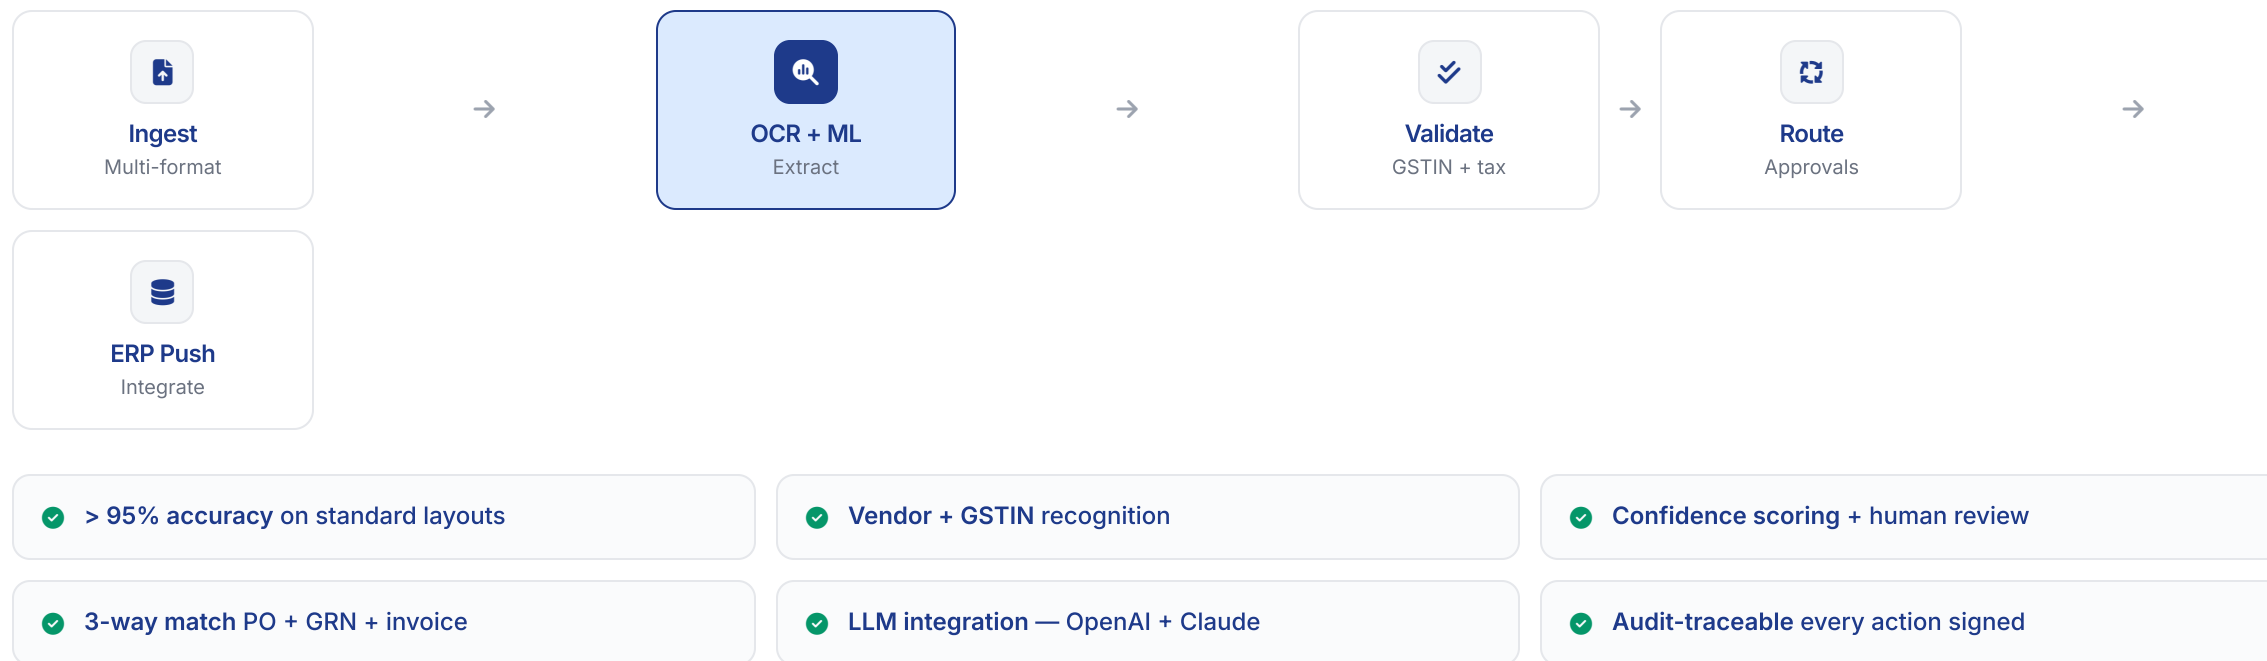

• R&D + BUILD

Enterprise Data Platform (under NDA)

Multi-year engagement engineering a high-volume scientific data platform for an R&D-focused enterprise client.

Document intelligence in production.

Quantum computing for financial data analysis.

● ACTIVE DEVELOPMENT

🇺🇸 US-BASED CLIENT

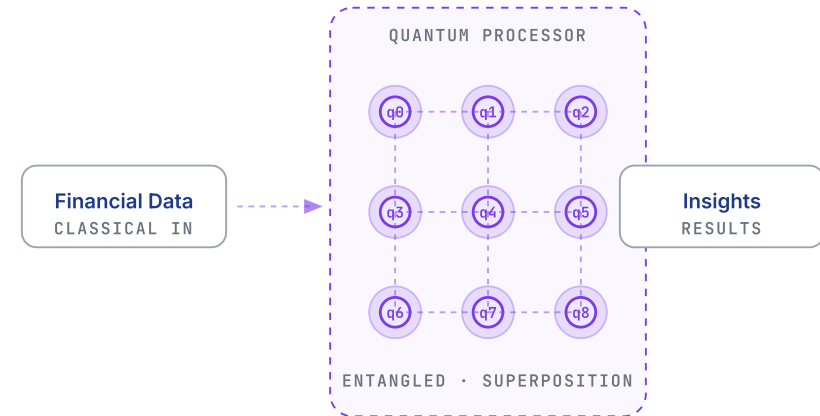

🚀 INNOVATION

We are currently developing a **quantum computing platform** for a US-based client, enabling researchers and financial institutions to process complex financial datasets using quantum algorithms.

An **ongoing innovation initiative** — the project is still in active development. It represents our commitment to working at the frontier of enterprise technology.

- ✓ Quantum algorithm orchestration
- ✓ Financial data ingestion
- ✓ Classical ↔ quantum pipeline
- ✓ Researcher workbench
- ✓ Result visualisation
- ✓ Audit + reproducibility

HYBRID ARCHITECTURE

Six structural reasons.

// 01

Scalable Architecture

Multi-tenant + RBAC + observability. Proven at 300+ enterprise clients.

// 02

Engineering Excellence

Founder-engineers + named senior practitioners on every engagement.

// 03

Enterprise Security

Encryption, RBAC, audit log, DPDP + GDPR-compliant patterns built-in.

// 04

Frontier Innovation

Active quantum computing initiative, AI + OCR in production.

// 05

50+ In-House Team

Permanent engineers + designers + analysts. No outsourcing.

// 06

Long-Term Partnership

Average engagement 22+ months. Built for AMC + roadmap.

Eight years. Production scale.

300+
